

Conclusions

Contributions - The solution presented in this work can be used and improved for the registration of a 3D Model w

Lessons learned - How to make a research in a specific field.

- How to work in a project that already has many specifications defined.
- How to work with third-party libraries in order to ease the implementation of a project.
- How to adapt yourself to the changes in the requirements of a project.

Future work - There are two possible options to improve the performance of the system (reduce the time of registra

- One can work with 3D features and find directly a 3D transformation that aligns the CityGML-Model and the po
